ABOUT

I am currently a 12th Grade Student, aspiring to be a web designer and graphics designer with a decent background in HTML, CSS, and Photoshop, Motivated to learn more and grow my skillset in the background of designing. I am dedicated to implementing my ideas in designing websites making user experiences pleasing and accessible.

EXPERIENCES

Graphics Designing | 2021 - 2024

In 4th grade, I participated in a school-level journalism competition, where I made Newspaper designs and articles, It's that time where I got the hook for graphic designing. 2021 mid-quarantine, I focused on graphic designing which led to taking on a few freelance design commissions mostly anime(for a community-based account profile), cartoon-themed(A Minecraft server icon) designs, Movie poster (for a school project), and continued to hone my designing skills.

Practical Research | 2023 - 2024

Participated as one of the leaders in a research group project about the effect of insufficient technology equipment on the learning practices of information and communication technology students at our school.
